Are You Wired to Deliver the Best in Home Automation & Security?

Meet The Tech Challenge

Today, as millions of consumers demand a dizzying array of home communications and security systems, many builders feel out of the loop. Others struggle to keep pace with customer orders, including:

- Multiple telephone lines
- High-speed Internet Access
- 24x7 Home security
- Home offices
- Computer & printer networking
- Home theaters
- Satellite systems
- Wireless

Partner with a Proven Leader

Now, there's a better way for homebuilders of all sizes to leverage this growing opportunity...and boost sales, enhance customer satisfaction and reduce management time.

Meet the pros from Questron. We're one of the Mid-Atlantic's leading telecommunications and data installation companies with an extensive track record in home automation. Questron works with such leading builders as Gemcraft Homes and Ryan Homes to design and install the very best in structured wiring packages to meet today's needs and tomorrow's dreams.

The Questron Advantage

Our highly trained team meets personally with every customer to design a hard-wired security and home communications solution to make your buyers ecstatic. Packages include:

- Quad shield RG 6 cabling for video
- Audio cabling for speaker & home controls
- Fiber optic cabling
- Category 5e cabling for telephone, computer & Internet sharing
- Home security & monthly monitoring

"Questron's structured wiring packages have become a standard feature in all of our new homes – and our customers couldn't be happier. Questron's dedication to quality, exceptional service and reliability is second to none."

Bill Luther, President, Gemcraft Homes
